MEANS OF CONTROL

Product line:Our prodcuts are produced by full automatic lines,which make sure the glove quality stable and reliable.

Quality inspectors:we have professtional quality inspectors with full of experience.They check periodically and pick out which is the good one and which is defective one then we send them to test EN388(such as abrasion),EN ISO 21420... every 5 year,make sure the products high quality.

QC inspect the factory every hour. If workers pick out the defective glove embryos during production, we will double reward workers, packaging is the same, as long as they pick out, they will double reward employees.

Quality inspection mainly depends on the end of the production line, responsible for wrinkling, permeability, dipping level, the first time to adjust if there is a problem.

After packing, the packing worker will stamp his name on the cardboard box, and after quality inspection, he will stamp his own stamp, so that we will know which link is wrong when we find the problem later. So as to avoid making the same mistake next time.

Manufacturer staff:We have staff training every month,which can enhance the quality of employees.
